## What's Really Important When You're Designing The Low ...

This essential aspect of switchboard design deals with the separation of live parts, functional units, terminals and glanding facilities and is defined in BS EN 60439. Low-voltage switchgear - Types of forms of separation. Detailed information is also available in

the BEAMA Installations' "Guide to Forms of Separation".

The specifications for the circuit dimensioning must be fulfilled. The ACB has advantages if full selectivity is required. However for cost reasons, the ACB is only frequently used in the distribution circuit as of a rated current of 630 A or 800 A. As the ACB is not a current-limiting device, it differs greatly from other protective devices such as MCCB, MCB and fuses.
